

A detailed topographic map showing a mountainous region. The map features brown contour lines indicating elevation, with labels such as 45.2, 45.5, 46.2, 47.1, 47.7, 48.5, 49.1, 49.6, 50.1, 50.5, 51.0, 51.9, 52.0, 52.7, 53.0, 53.5, 54.0, 54.5, 55.0, 55.5, 56.0, 56.5, 57.0, 57.5, 58.0, 58.5, 59.0, 59.5, 60.0, 60.5, 61.0, 61.5, 62.0, 62.5, 63.0, 63.5, 64.0, 64.5, 65.0, 65.5, 66.0, 66.5, 67.0, 67.5, 68.0, 68.5, 69.0, 69.5, 70.0, 70.5, 71.0, 71.5, 72.0, 72.5, 73.0, 73.5, 74.0, 74.5, 75.0, 75.5, 76.0, 76.5, 77.0, 77.5, 78.0, 78.5, 79.0, 79.5, 80.0, 80.5, 81.0, 81.5, 82.0, 82.5, 83.0, 83.5, 84.0, 84.5, 85.0, 85.5, 86.0, 86.5, 87.0, 87.5, 88.0, 88.5, 89.0, 89.5, 90.0, 90.5, 91.0, 91.5, 92.0, 92.5, 93.0, 93.5, 94.0, 94.5, 95.0, 95.5, 96.0, 96.5, 97.0, 97.5, 98.0, 98.5, 99.0, 99.5, 100.0. A prominent dashed red line forms a large polygonal shape, likely representing a boundary or a specific land parcel. This line is composed of several segments, some of which are solid red, while others are dashed. The area inside this boundary is mostly white, except for a large, irregularly shaped area at the bottom right that is shaded in gray. This gray area is bounded by a solid green line on its left and top edges, and a dashed red line on its right and bottom edges. The map also includes various other features: blue lines representing water bodies or drainage paths, black lines representing roads or trails, and small black squares representing buildings or structures. There are also numerous small green triangles scattered across the map, possibly indicating specific points of interest or survey stations. The overall terrain appears to be rugged and mountainous, with steep slopes and deep valleys. The map is oriented with North at the top, as indicated by a north arrow in the upper right corner. The scale of the map is not explicitly stated, but the contour lines suggest a vertical scale of 1:1000 or similar. The map is a technical drawing, likely used for land management, surveying, or planning purposes. The use of different colors and line styles helps to distinguish between various features and boundaries, making the map easy to interpret. The gray shading at the bottom right is a key feature, possibly representing a specific land use or a protected area. The dashed red line is another important feature, defining a large area of interest. The map provides a comprehensive overview of the terrain and its various features, allowing for detailed analysis and planning.
